YEARS

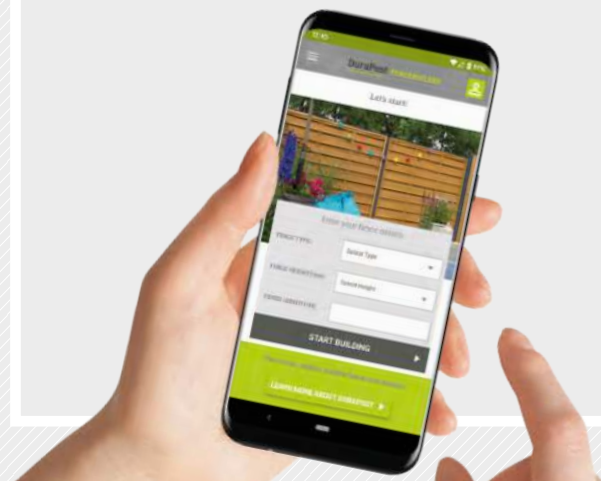

FED UP WITH THE ANNUAL FUSS OF FENCE MAINTENANCE?

Dealing with rotting, cracking and warping fence posts and panels is a pain. As your fence gets older it can become an annual event that takes time and costs money. We set our engineers the task of finding a better, easier way of doing things. Their response was...

FENCING REIMAGINED

DESIGN YOUR DREAM GARDEN WITH THE DURAPOST® APP

IMAGINE THIS...

- A versatile fencing system that's easy to fit and built to last.
- Innovative 'H'-shaped fence posts made from cold-rolled galvanised steel in a choice of 4 colours
- Composite durable fence panels made from up to 70% recycled materials for environmental sustainability
- A range of accessories including capping rails, post caps, gate posts and gravel boards
- Designed so installation can be completed by a single person

That's DuraPost® along with DuraPost's composite Vento or Urban panels.

Better and easier fencing you can fit and forget.

IN THE BEGINNING WAS DURAPOST®

It all started with a cleverly designed fencepost with a unique 'H'-shaped design which can fit virtually any type of fencing panel or board, light enough to be easily carried by one person and strong enough to withstand wind speeds of 110mph*.

LIGHTER, STRONGER AND EASIER TO FIT GALVANISED STEEL FENCE POSTS IN A RANGE OF FOUR COLOURS

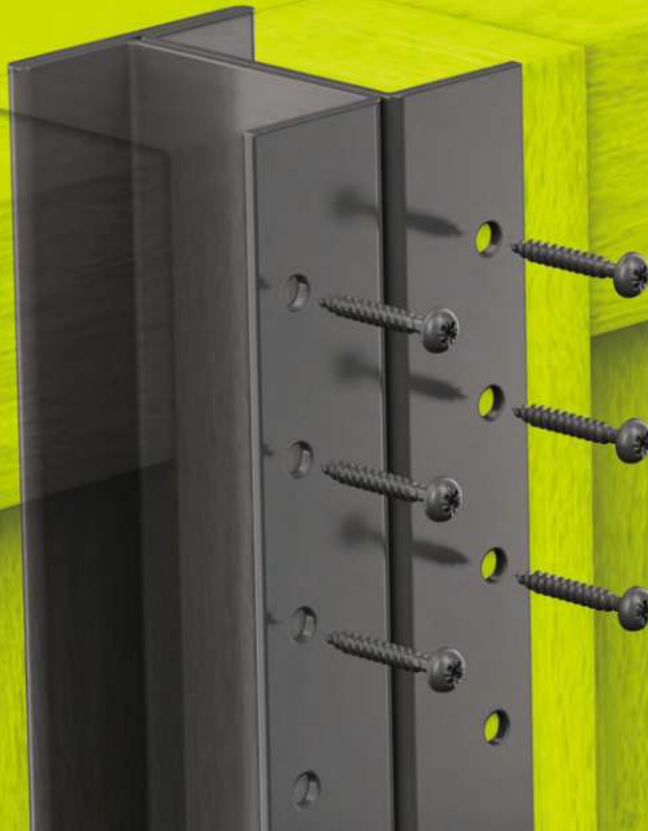

AVAILABLE COLOURS

BROWN

GALVANISED
STEEL

*DuraPost® has been tested at the Building Research Establishment (BRE). Tests based on a 1.8m x 1.8m bay installed 600mm into the ground as per industry norm.

PEACE OF MIND GUARANTEED

Our maintenance free fit and forget fencing is light, secure and easy to install. Made in the UK, it is the sustainable fence post solution that offers flexibility in configuration and colour to suit your needs.

QUALITY, GUARANTEED

DuraPost® is guaranteed to endure UK weather for up to 25 years** without warping or cracking

STRONG & SECURE

DuraPost's pre-drilled holes mean fence panels are securely fixed and won't lift up and out.

HAPPILY COMPATIBLE

DuraPost's 'H'-shaped cross section is compatible with virtually any type of fence panel or board.

COLOUR CONSCIOUS

DuraPost® blends or contrasts as you choose, with colour-matched screws available to order

QUICK & LIGHT

DuraPost® is 80% lighter than concrete and can take up to half the time to install

ENVIRONMENT FRIENDLY

DuraPost® is made of 50% recycled steel and is 100% recyclable at the end of its long life.

THE SUSTAINABLE LOW-CARBON, LOW MAINTENANCE LONG-LASTING SOLUTION

COMPOSITE PANELS MAKE FENCING COMPLETE

DURAPOST® VENTO PANELS

AN UPDATED CLASSIC

Ideal for traditionalists who like a vertical overlap style garden fence, DuraPost's innovative composite Vento panels, made from up to 70% recycled materials, give a heritage finish that is both longer lasting and more sustainable. They are guaranteed to make garden fencing fuss free.

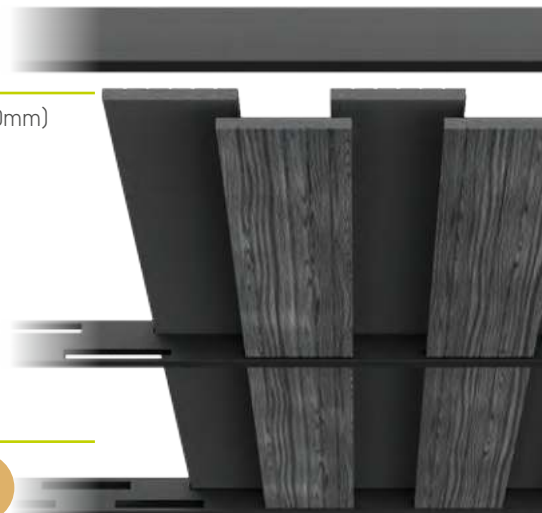

EXPERIENCE THE DIFFERENCE:

- ✔ No pre-drilling needed, self-drilling screws supplied as standard
- ✔ Mould and rot resistant
- ✔ UV tested to ensure a longer lifespan than wood equivalents
- ✔ A choice of 3 colours: Grey, Brown or Natural
- ✔ 100% maintenance free: guaranteed to fit and forget

DIMENSIONS

6'x6' (1830mm x 1830mm)

COLOURS

DURAPOST® URBAN PANELS

NEW ARCHITECTURAL CHIC

An exciting new option for those looking for a more architectural style to define their space, DuraPost's Urban panels bring a more contemporary look to garden boundaries. The 70% recycled material is especially carbon conscious for urban dwellers who are environmentally friendly.

THE COMPLETE PACKAGE:

- ✓ Lightweight unique design for easy installation with DuraPost®
- ✓ Modular slatted panel system of 6 boards and 2 horizontal u-shaped cross rails
- ✓ Panels made from rice husk and recycled High Density Polyethylene (HDPE)
- ✓ Cross rails are nano-coated and powder-coated galvanised steel
- ✓ A choice of 3 colours, 100% maintenance free

CASE STUDY:

ALEX (COVENTRY)

THERE ARE TWO SIDES TO EVERY FENCE –
SOMETIMES YOU SEE BOTH.

Apart from the maintenance and replacement problems that face all homeowners, those with a boundary that runs alongside a road or footpath have a more complicated problem to contend with – they have to look after both sides of the fence. In Alex's case, living in a property facing a busy road, she had the problem of dirt and dust from the constant traffic making the outside of the property look grubby.

When Alex discovered that she could clean DuraPost's Vento panels with her power-washer she was absolutely delighted.

'The old wooden panels were so difficult to clean,' she told us. 'What's more we didn't like using the power-washer on the wood as we'd had problems before having to replace bits of fencing that had rotted away.'

" We didn't need to find a fence builder or wait for it to be done because my husband was able to install it himself!"

'When you consider the time we spent painting or re-staining the old timber we used to have, which generally needed doing on an annual basis, using DuraPost® and Vento Panels has been a real 'less hassle win-win.'

A friend had suggested Alex use the new DuraPost® Vento Panel, because it was easy to install and would stand the test of time. It particularly appealed to Alex as her husband was able to construct it without any specialist knowledge.

'I'm absolutely delighted with how it's turned. We didn't need to find a fence builder or wait for it to be done because my husband was able to install it himself! It took less than 5 hours to complete the whole fence and he didn't have any issues.'

As well as being built to last and easy to work with, Alex also felt good about the fact that her new fence was not only attractive but environmentally friendly.

'When it comes time to replace the fencing in our back-garden, we'll definitely opt for DuraPost® Vento panels. They easy to put up, the colours are great and the fact they are made from 70% recycled material means we don't feel responsible for cutting down trees – that's something to tell the neighbours.'

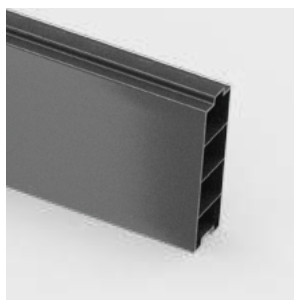

Though the Vento panels were a more expensive option than the traditional wooden fence, Alex and her husband saw it as an investment that would save money over time by lasting longer and reducing their property's annual maintenance costs, safe in the knowledge it was guaranteed to do so.

CUSTOMISABLE DESIGN

DURAPOST® ADJUSTABLE ALUMINIUM GATE KIT

ALL THE KIT YOU NEED TO MAKE AN ENTRANCE

We understand that different fences may need gates of different sizes. Therefore we've designed our gates to adjust to fit any outside space. This versatile concept means you can choose the height and width you need at the fitting stage with no need for extra measuring-up. Then you can customise the look with your choice of panels in 3 colours. To combine security with flexibility, you can attach your gate to a DuraPost® gate post or a timber one.

WHAT'S INCLUDED:

- ✓ Powder-coated aluminium frame in choice of 3 colours
- ✓ Gate slam
- ✓ Secure lock
- ✓ Hinges and fittings

FULLY ADJUSTABLE

Put your own wood panelling in here or create one in using DuraPost® composite panels or gravel boards

COLOURS

DURAPOST® HEDGEHOG HIGHWAY HOLE

HELPING WILDLIFE IN YOUR GARDEN

The UK's hedgehog population is declining at a worrying rate, especially in rural areas. Many homeowners don't realise that hedgehogs are a real benefit to gardens – they're really good at eating things like slugs. Allowing hedgehogs to move freely between gardens to find food, shelter and mates is one way to combat this problem. In response to this crisis, working with the British Hedgehog Preservation Society, Birkdale has created a savvy solution to the UK's rural hedgehog crisis - The Hedgehog Highway made possible by the DuraPost® Hedgehog Hole. Whether you live in the country or a more urban area, when you are installing your fence we urge you to consider including a Hedgehog Hole.

For every Hedgehog Hole sold we donate 50p to the Hedgehog Street charity.

DURAPOST® Z-BOARDS

CUTTING EDGE GRAVEL BOARDING

We've designed the Z-Board specifically to work with the DuraPost® fence post, to create a high quality and attractive solution to the traditional gravel board. It is made of Glass Fibre Reinforced Plastic, so is lighter than concrete and timber alternatives while still providing exceptional strength. Being both easy to work with and element resistant, our Z-Board is the perfect pairing to your DuraPost® panels and posts.

WHAT TO EXPECT:

- ✔ Strong, lightweight and rustproof
- ✔ UV resistance tested to 500 hours with no sign of weathering or weakening
- ✔ Available in three colour finishes: Anthracite Grey, Olive Grey and Sepia Brown
- ✔ The 150mm Z-Board comes in a choice of 1.83m, 2.4m and 3.0m lengths

DIMENSIONS

Double: 300mm h x 50mm d
Single: 150mm h x 50mm d

CASE STUDY:

CRAIG (PORTSMOUTH)

USING DURAPOST® WAS A NO-BRAINER FOR CRAIG, WHO WAS LOOKING FOR A MAINTENANCE-FREE FENCING SOLUTION FOR HIS GARDEN.

Name: Dan Young

Company name: A-Plan Fencing

Location: Portsmouth

Website: www.a-planfencing.co.uk

Dan says:

"I really enjoy working with DuraPost® products and would recommend them to anyone, they're a win-win for homeowners and installers alike. They're great quality, easy to install and my clients are always pleased with the resulting modern look."

Craig was experiencing the same problems facing many homeowners with wooden fence posts. "It was becoming an annual ritual to repair or replace our rotten fence posts, so the overriding incentive for us to choose DuraPost® was its durability," Craig explains.

"We also wanted something more stylish than cumbersome concrete posts, and DuraPost® ticked all the boxes." As well as being built to last and easy to work with, Craig also notes that it is an attractive fencing solution. "We hadn't considered it before," he says, "but having colour options made the product even more appealing. The grey posts match our conservatory roof and garden furniture, and tie our internal and external spaces together nicely."

A friend had suggested Craig use DuraPost®, and he found it easy to find a trained installer. "We were recommended a professional installer from our local DuraPost® supplier," he says. "It was brilliant having someone who knew the products do the job. It only took him a day and a half to complete the 20 metre project, which we were really impressed with."

Craig took advantage of the DuraPost® Fencebuilder App, and was pleased with how easy it was to use. "The app was great, as it quickly gave us an accurate picture of our plans with the colour options available and a list of all the components we'd need to create it."

"The finished look is fantastic and we're really happy with it - DuraPost® has proved an absolute winner."

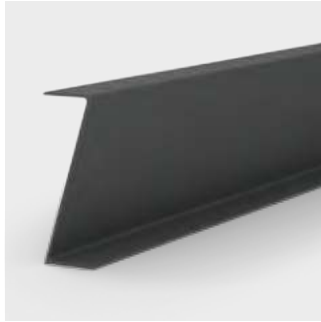

Having spent days painstakingly replacing rotten fence panels in the past, this time around Craig was keen to use gravel boards so that the panels did not sit directly on the ground. "Just like the posts, the DuraPost® Z-Boards have proved ideal for the job. They're strong yet light, resistant to the elements and complement the posts perfectly. The finished look is fantastic and we're really happy with it - DuraPost® has proved an absolute winner."

GET THE LOOK

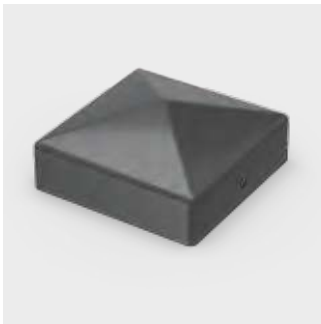

Anthracite Grey Classic DuraPost®

The Classic DuraPost® provides style and stability to fencing projects. They can withstand the elements too and have been wind tested in speeds of up to 110mph.

Anthracite Grey Z-Board Gravel Board

Our cutting-edge gravel board, designed specifically to work with the DuraPost® fence post. Created with Glass Fibre Reinforced Plastic (GFRP).

Anthracite Grey Post Cap

The cherry on the cake. DuraPost® Anthracite Grey Post Caps look smart while helping to protect the post they're on.

Anthracite Grey Cover Strips

Designed to improve the aesthetics on the fixing side of the post and can be added on afterwards to any DuraPost® project.

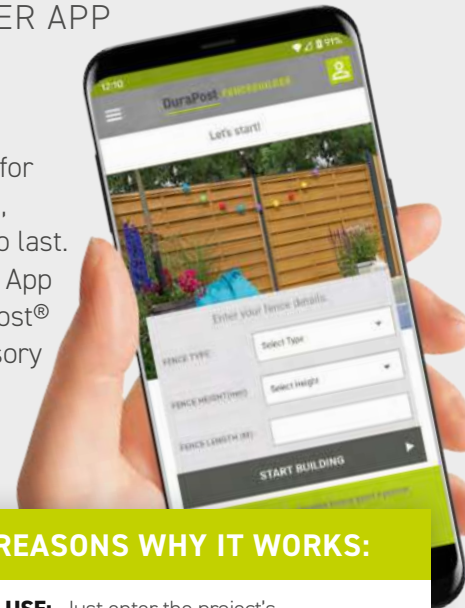

DESIGN IT YOURSELF

SEE YOUR IDEAS COME TO LIFE IN DURAPOST'S NEW AND IMPROVED FENCEBUILDER APP

CASE STUDY:

BARRY & BETTINA (COVENTRY)

SEARCHING ONLINE FOR AN ALTERNATIVE TO THEIR ROTTING WOODEN FENCING, BARRY AND BETTINA WERE DELIGHTED TO FIND THE DURAPOST® WEBSITE.

"The main attraction of DuraPost® for us was that it doesn't rot, and it has provided the perfect long term remedy to our rotten wooden fence posts," says Barry. "We found the company online after searching for an alternative to wooden posts, and are really pleased we did."

Bettina adds that they found the website intuitive, and the installer search function on the site made their project a lot easier to set into motion. She notes, "the DuraPost® website was easy to use, and it provided thorough descriptions of the products which helped us choose the best option for our requirements. We found a trained installer on there as well, whose work and knowledge of this fencing was fantastic."

"We're really pleased with this fencing solution... a lot of people see it every day and comment on how great it is."

Pleased with the ease and speed with which their installers completed the job, Barry and Bettina are enjoying the look of their improved outdoor space, as well as the privacy it lends with the village hall next door. "Craig and Steve installed the 30 metres of fencing without any challenge, and the result is just as we hoped it would be," comments Barry.

Company name: Healy Fencing
Location: Shirley, West Midlands

Review:

"We found "Healy Fencing" from the Birkdale site. The two people who erected our fence were Craig and Steve, they were great in every aspect of the job. We certainly would recommend Connor, Craig and Steve of "Healy Fencing" to anyone."

Find out more about Healy Fencing on Instagram [@healy_fencinglandscapes](#)

“The overall look is great, and we really like the colour of our new posts”

"The overall look is great, and we really like the colour of our new posts," Bettina explains. The couple chose the Anthracite Grey colourway, out of an appealing choice of four. "We're really pleased with this fencing solution. As we live next door to the village hall, a lot of people see it every day and comment on how great it is."

When asked if they would put forward the range to a friend looking for new fencing, Barry advises, "we'd recommend DuraPost® to anyone."

EASIER TO FIT THAN TRADITIONAL POSTS

THE DURAPOST® SYSTEM IS DESIGNED TO BE
INSTALLED BY ONE PERSON

With DuraPost®, it's never been more straightforward to fit your fencing. If you're using pre-made panels, simply dig the hole and set your first DuraPost® in with FENCEMATE® Post Concrete. Secure your gravel board into position with colour-matched screws, then slot your pre-made fence panel to the DuraPost® and screw into place. Next, position the second DuraPost®, check the alignment and then set with Post Concrete. Job done!
